Summary

Computer Science and Technology undergraduate with hands-on experience in software development and real-world applications. Proficient in Python, Java, React, and Django, with strong foundations in data structures, problem-solving, and full-stack development. Seeking to build scalable software solutions.

Education

LJ University

B.Tech in Computer Science and Technology

Aug 2024 – Present

Ahmedabad, Gujarat

Skills

Languages: Python, Java, JavaScript, HTML5, CSS3

Frameworks & Libraries: React.js, Node.js, Express.js, REST API, Flask, Django, Tailwind CSS

Databases: PostgreSQL, MongoDB

Core: Data Structures & Algorithms, OOP, DBMS, JWT, Git, GitHub

Projects

Nexora – AI-Powered Developer Career Platform [Live Demo](#)

Jul 2026 – Present

Python, Django, PostgreSQL, React.js, Tailwind CSS, Groq LLaMA 3, Gemini AI

- Built a responsive full-stack platform across 10+ pages using React 18, Vite, and Django REST Framework, featuring interactive dashboards, code editors, and real-time quiz feedback.
- Integrated Groq LLaMA 3 AI to analyze up to 25 code files in seconds, automatically outputting severity-tagged issues and a 5-step prioritized fix plan.
- Developed 20+ REST API endpoints to connect frontend UI components seamlessly with backend databases for roadmap tracking and challenge submissions.
- Engineered secure user workflows with Google Sign-In and JWT tokens, managing user sessions, daily streaks, and verifiable certificate generation.

StudyVerse – AI-Powered Student Productivity Platform [Live Demo](#)

Feb 2026

Python, Flask, PostgreSQL, HTML, CSS, JavaScript, WebSockets, Gemini AI

- Built REST APIs with Python, Flask 3.0, Google OAuth 2.0, Authlib, and secure password hashing.
- Designed 15+ PostgreSQL/Neon tables and optimized relational database architecture using Python migration scripts (psycopg2) and automated backup routines.
- Built document processing and AI pipelines using PyPDF2 and Google Generative AI SDK for multi-modal text/image analysis and automated task scheduling.
- Implemented real-time asynchronous communication using Eventlet, WebSockets, and Socket.IO for multi-client synchronization in live study rooms and competitive quiz sessions.

SkillBridge – Freelancing Platform [Live Demo](#)

Jan 2026

Python, Flask, PostgreSQL, HTML, CSS, JavaScript, WebSockets, Gemini AI

- Developed a full-stack freelancing platform using Python and Flask, enabling clients to post projects and freelancers to discover opportunities and submit proposals through a role-based workflow.
- Designed and integrated RESTful APIs to manage users, projects, proposals, and application workflows with structured backend logic.
- Built responsive and user-friendly interfaces using HTML5, CSS3, and JavaScript, ensuring consistent usability across devices.

Certifications

- Introduction to Java – LearnQuest 2024
- Inheritance and Data Structures in Java – Penn 2025
- Introduction to HTML, CSS, & JavaScript – IBM 2025
- Exploratory Data Analysis for Machine Learning – IBM 2026
